

An incredibly comfortable full body fall arrest harness. The padded structure wraps the body for the most uniform distribution of pressure. STS automatic buckles on the waist and legs make it extremely easy to put on and take off.

Equipped with special loops for connecting the Helpstep (ref.2062, sold separately) foot loops to help prevent suspension trauma in the event of a fall.

Two fall arrest attachment points: double textile loop in the front, aluminum alloy ring in the back. Textile loops on the sides for work positioning.

Equipped with NFC TRACK tag for digital identification.

2 sizes.

TOWERS/INDUSTRY, ROOFS, CONSTRUCTION

- 1 Padded structure wraps the body for the most uniform distribution of pressure.
- 2 Patented STS automatic buckles on the waist and legs make it extremely easy to put on and take off.
- 3 Double textile loop integrated with the structure for the frontal fall arrest attachment point.
- 4 Forged aluminium alloy ring for the back fall arrest attachment point.
- 5 Textile loops on the sides for work positioning.
- 6 Easy-to-adjust buckles made from carbon steel.
- 7 Belt padded with 3D mesh for better comfort and breathable.
- 8 Comfortable padded leg-loops.
- 9 Adjustable back webbing for best comfort.
- 10 Main webbings made from polyester, 44 mm wide.
- 11 Reflective parts.
- 12 Sternal strap with plastic buckle.
- 13 Gear-loops with protective plastic tube.
- 14 CE label with serial number and batch number.
- 15 Equipped with NFC TRACK tag for digital identification

C.A.M.P. presents in this catalog a **complete solution for the digital management of PPE**, both for allocation to users and for periodic inspections: the **NFC TRACK hardware tags on the products** work seamlessly with the **G.T.S. - Gear Tracking System software** to make the system very intuitive and easy to use.

**NFC TRACK chips are installed on many C.A.M.P. products** (harnesses, helmets, Retexo lanyards). They **can also be attached directly on any PPE** by the user, so that the user can assign the PPE data to the chip by means of the C.A.M.P. G.T.S.

**NFC (Near Field Communication) technology** is now present on most smartphones and used every day for smart payments. Today, it also represents the future for the individual identification of products.

The **HF RFID (High Frequency Radio Frequency Identification)** communication system on which NFC is based allows the C.A.M.P. NFC TRACK to be easily read using any latest generation smartphone or for professionals using a PC reader.

## - G.T.S. - GEAR TRACKING SYSTEM

G.T.S. allows professionals to easily manage PPE both via the smartphone app (available on Play Store and Apple Store) and from a PC via the web app.

Two different packages allow for carrying out periodic inspections and also for managing the company allocation of PPE to its employees.

The database of **G.T.S. includes the technical information of all C.A.M.P. products** for work at height and a **large number of other products** posted by other users of the community with publicly available information.

**NFC TRACK chip installed!**
